WORK EXPERIENCE

Technical Mentor (Programming) · MAJU CodeCraft

Dec 2025 – April 2026

- Mentor junior students by troubleshooting and resolving complex programming issues.
- Instruct peers on fundamental programming concepts and algorithmic problem-solving strategies.
- Facilitate hands-on learning sessions focusing on core C++ principles, including arrays, loops, and recursion.

Technical Team Member · ACM and MLSC - MAJU

Oct 2025 – Jan 2026

- Coordinated with a cross-functional technical team to successfully manage and facilitate interactive technical workshops.
- Developed supplementary technical documentation and study resources, enhancing course comprehension for university students.

KEY PROJECTS

Video-Sharing Platform API | Node.js · Express · MongoDB

- Architected a RESTful backend API using Node.js, Express.js, and MongoDB (Mongoose), structuring the codebase into layered routes, controllers, and middleware, and modeling referenced schemas for users, videos, and channel subscriptions.
- Implemented secure authentication with JWT access/refresh token rotation, httpOnly cookie sessions, and bcrypt password hashing, backed by custom middleware for route protection and centralized async error handling.
- Built a Multer-to-Cloudinary upload pipeline for avatar/cover-image assets and standardized every API response with reusable ApiError/ApiResponse utility classes.
